

COVID-19: THIS IS HOW WE WORK AT AURORA SPA TO PROTECT YOU AND OUR STAFF

There are different types of virus and the Corona virus and Covid-19 virus die in contact with chlorinated water. We also use UV light in our purification facility which gives added protection. Thus, Aurora Spa has a double protection system against virus in our pools. For additional safety, we have increased the chlorine content in our water for a while. This increase in chlorine has no negative health effects whatsoever, so you can feel completely at ease relaxing at Aurora Spa. We follow the Swedish Public Health Agency's chlorine level directives and recommendations.

SMALL GROUPS

We admit only 20 people at one time to Aurora Spa.

EFFECTIVE DISINFECTION OF COMMON SURFACES

Aurora Spa uses a biodegradable, eco-friendly disinfectant that destroys both bacteria and flu virus. We regularly disinfect all lockers, key-bracelets, doorknobs, handles and other common surfaces. Naturally, we also have hand sanitizer available at our spa.

SPA TREATMENTS

Our relaxing spa treatments can be booked on request. We use fabric masks when we do our facial treatments and disinfect the massage table after each customer.

BEFORE YOUR VISIT TO THE SPA

We do everything possible to prevent any spread of the Corona virus. We ask you kindly to please respect our guidelines and show other guests and our staff your utmost consideration.

PLEASE STAY HOME IF FEELING UNWELL

If you have any cold symptoms or feel you are becoming ill, we ask you to please stay home a few days to recover. Rest, drink tea and sit out in the sun if possible. We will be happy to see you when you are feeling well again!

WHEN VISITING OUR SPA

As our guest, we ask you to help and take extra consideration:

- Always shower before entering the pools.
- Wash your hands thoroughly with soap and warm water.
- Wipe down gym equipment/yoga mats with disinfectant which is available in the facilities.

WELCOME TO AURORA SPA!
